

PI-31000 IEEE Interface Card

Features:

- High Transfer Rate
- NI-488.2 for Windows 2000/NT/9x
- Plug and Play

Applications:

- GPIB Interface for CPCI

Overview:

The Pulse Instruments PI-31000 IEEE Interface Card is a standard GPIB Interface card offered by National Instruments.

This interface card is used in applications where the PI-2005 Pattern Generator or other instruments are controlled from a remote system CPU, or it can be used as the bus master when the CompactPCI CPU is the system computer.

PICMG®, the PICMG® logo and the Compact PCI® logo are registered trademarks of the PCI Industrial Computers Manufacturer's Group.
